Table of Contents

1. Prerequisites

CourseAid requires a computer with Internet Access and a browser to access its functionalities. An excel or csv file is used as input for Students list and marks for professor. MS office comes preloaded in most windows distros. Incase MS office isn't present, the user can use sheets.google.com as an offline and an offline tool to make their sheets.You can then download as the format of your choosing.
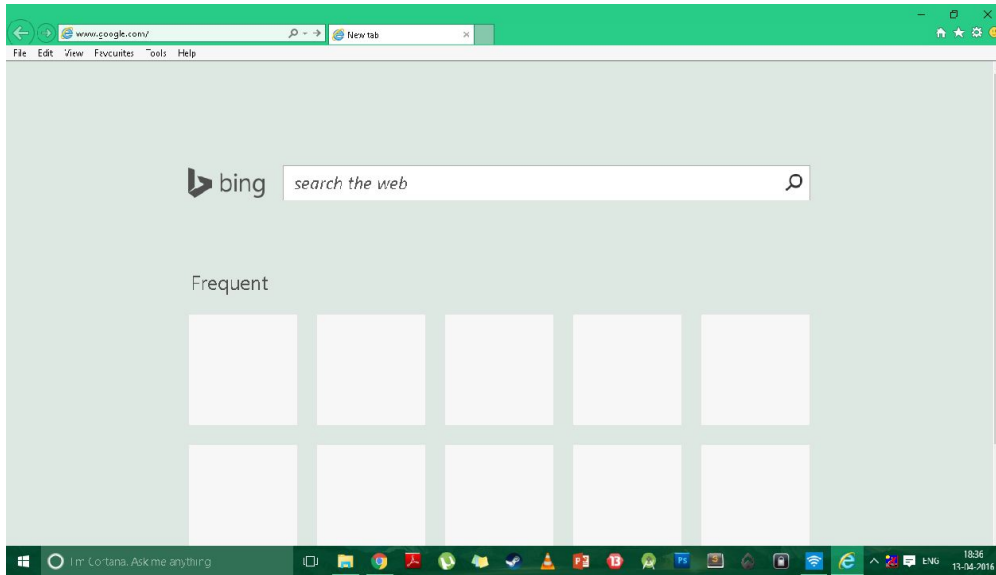

2. Installation

Internet Explorer comes preloaded on every windows distro.
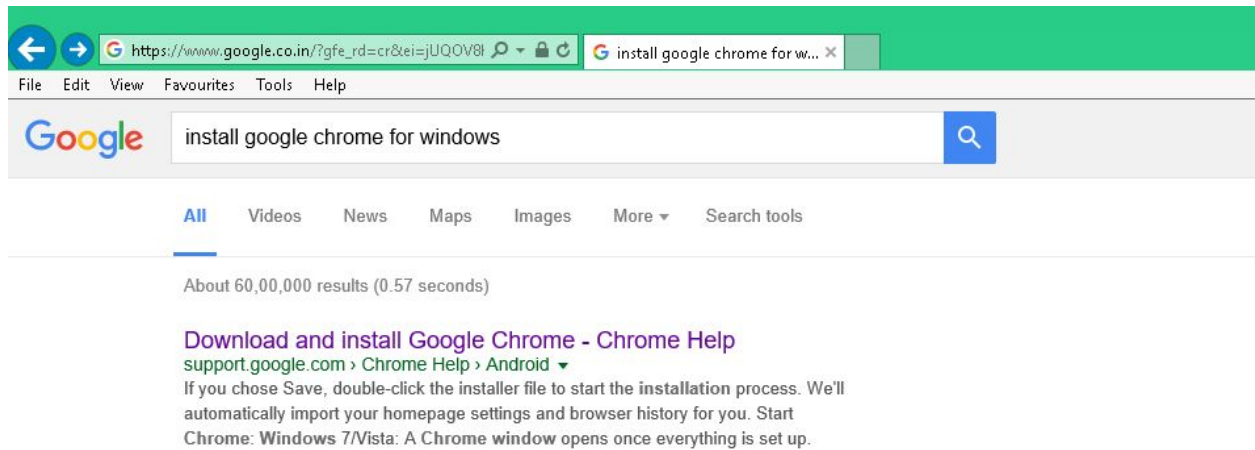

1.   Double Click on its icon.

2. Enter www.google.com in the url bar and press the Enter key

3. Type "install google chrome for windows" in the search bar(the one where the cursor is present)

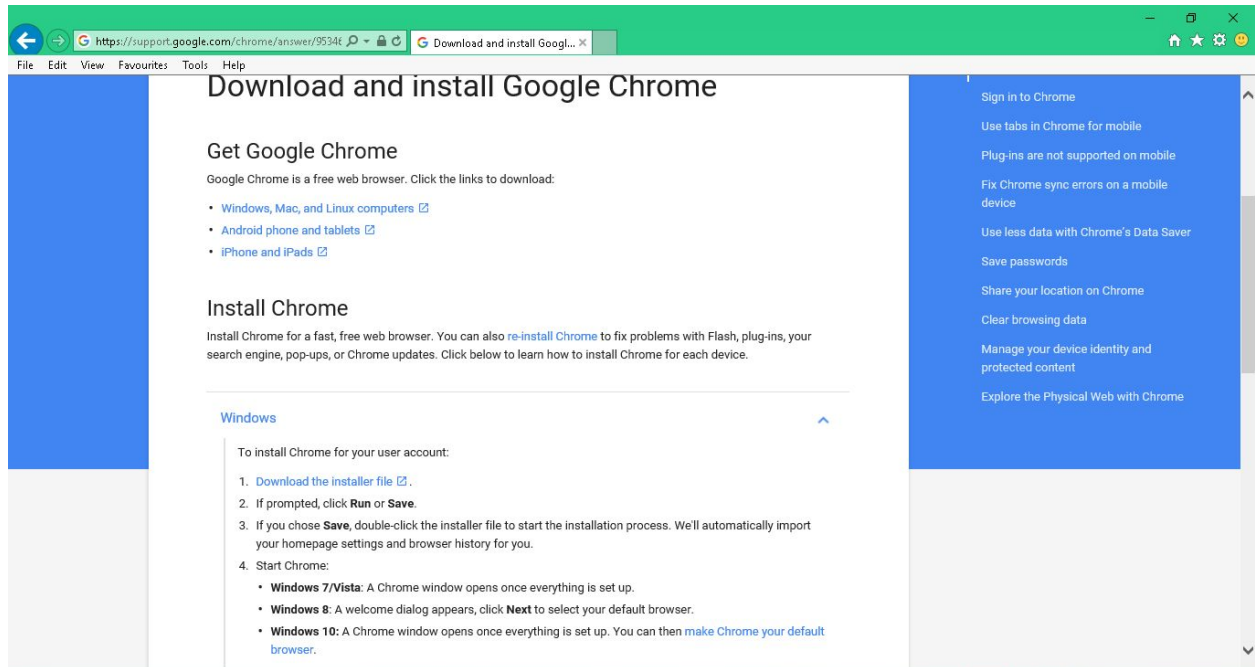

4. Click on the first link that appears

5. You will be redirected to a site which looks like this.

6. Scroll down to the Install Chrome section and click on Windows highlighted in blue to show a drag down menu.
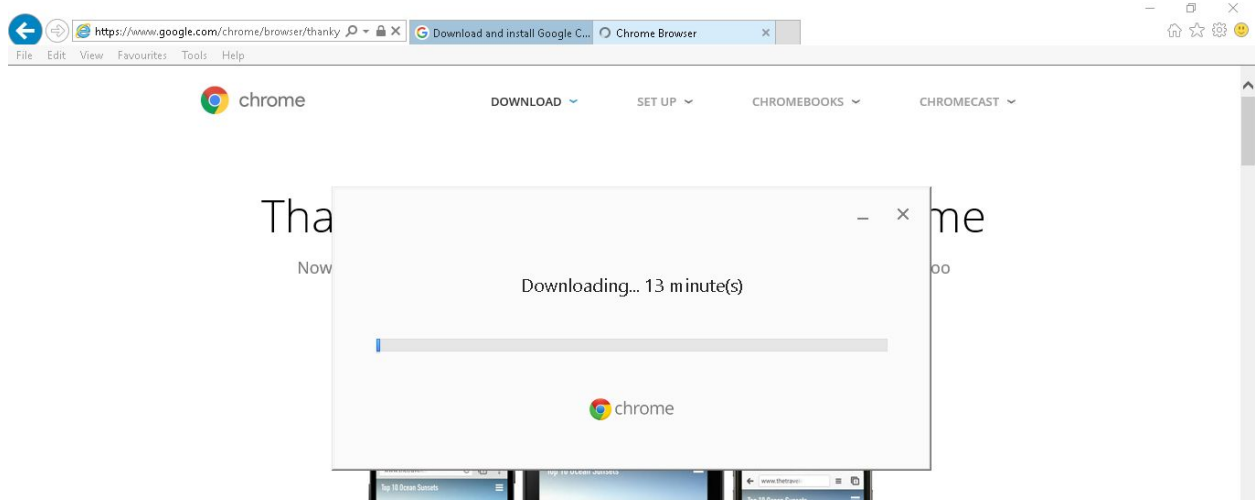

7. Click on the Download the Installer file link in blue. You will be redirected to a page where you have to click on Accept and Install after reading the Terms of Service.

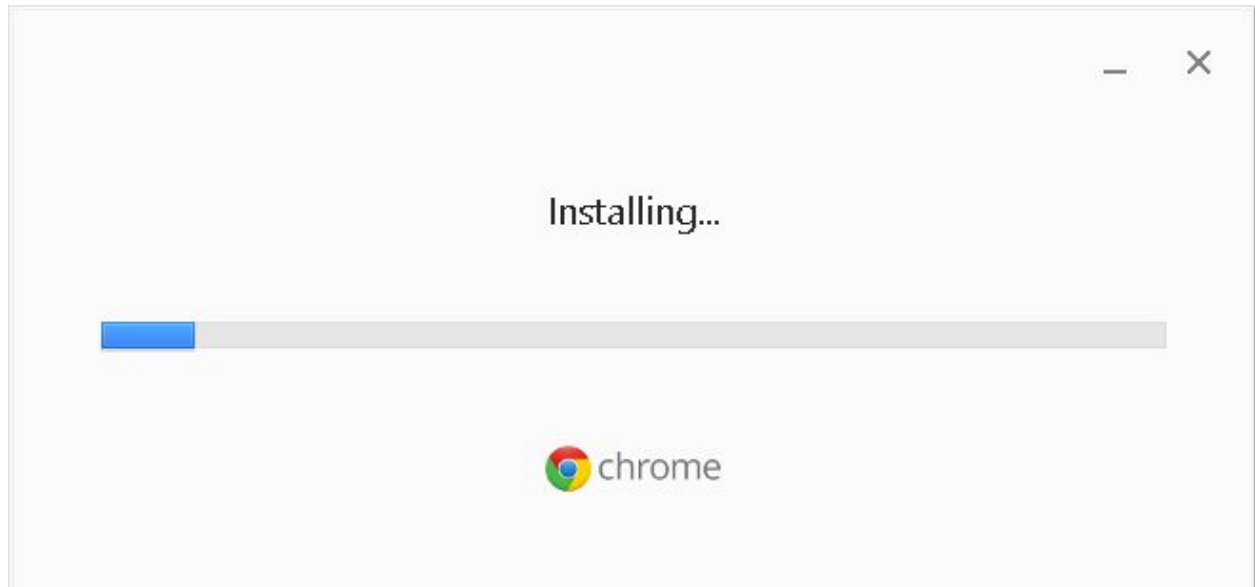

You may or may not check this option according to your wish. Click on learn more to learn more about the option.
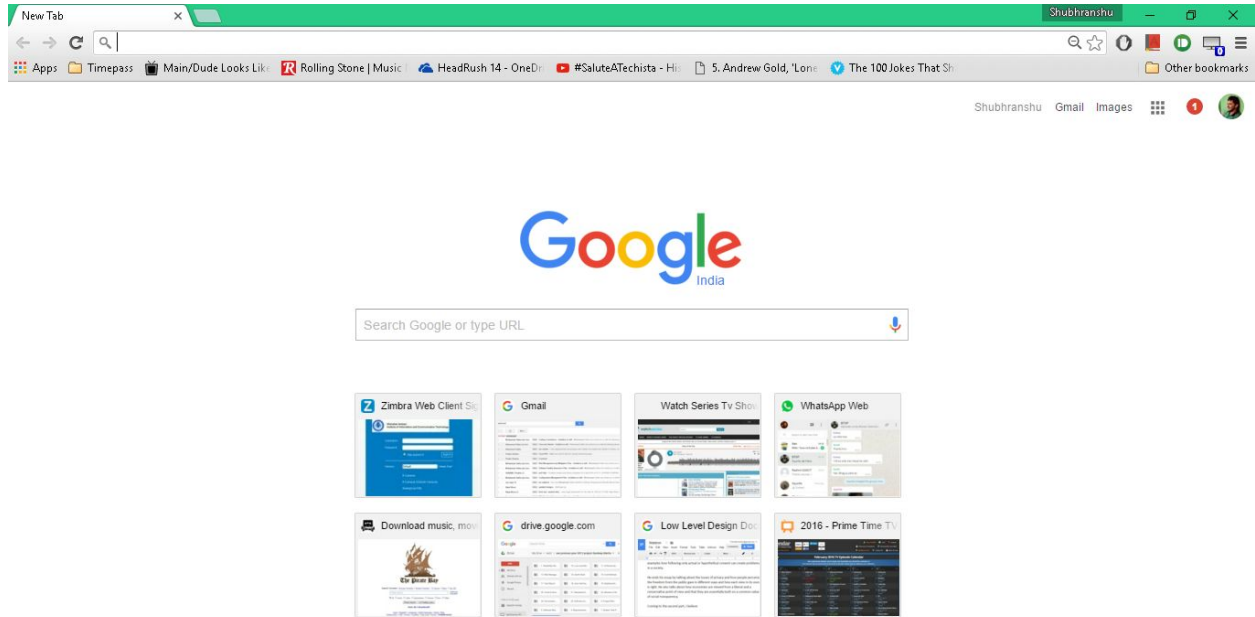

9. A Download window of Chrome will popup as shown.

10. An installation screen will appear.

11. A new google chrome window will automatically open up as shown.

12.

In case of professor open the website:- https://da-profsite.herokuapp.com/
In case of student open the website:- https://student-site.herokuapp.com/
Both of them will show this screen.

From now on, follow the tutorial section in the User Manual.
